Section 2

Local Area 911 Implementation

List all individual local areas covered by this report (e.g., Lee County, Virginia):

Lewis, Missouri

(a) For each area listed above, identify the emergency response point to which 911 calls will be routed.

In the county of Lewis, there hasn't been a PSAP designated for these counties nor does Missouri have a statewide default answering point. Therefore, we are in the process of identifying the appropriate local emergency authority to have these calls delivered to.

(b) For each area listed above, provide details of the carrier's progress in completing translation and other work necessary to route 911 calls to the identified emergency response point.

See response to (a) above.

(c) For each area listed above, provide the date or projected date that transition to the 911 abbreviated dialing code will be completed.

The projected date for implementation will depend on the responses received from the local authority.

Section 3

911 Implementation Problems

(a) Describe any problems the reporting carrier has encountered in identifying 911 number call routing points. Describe any other operation problems carrier has experienced during the initial transition stages.

N/A

(b) Where the reporting carrier has experienced 911 implementation problems, describe any efforts the carrier has made to coordinate with public safety agencies and state and local authorities.

N/A
